

A collection of light modifiers inspired by award-winning photographer Rick Friedman.

For over three decades, Rick Friedman has been photographing authors, professors, celebrities and US Presidential Candidates. Rick shares his unique, easy-to-adopt illumination style in his Location Lighting Workshops™ across the US and UK. The Rosco Location Lighting Filter Kit allows photographers the ability to master Rick's lighting techniques using the same Rosco products he uses in his photography and in his workshops.

The kit contains a selection of Rick Friedman's "must-haves" for his camera bag, including: Rosco color correction and color effect lighting filters, as well as two of Rick's favorite light modifiers - Tough Spun diffusion and Rosco Photofoil.

PRODUCT INFORMATION

Size: Sheet size: One 12" x 12" (30.48 cm x 30.48 cm) cut each of 23 different filters and one 24" x 24" (61 cm x 61 cm) sheet of Photofoil that is folded. The kit's components are rolled into a reusable plastic bag that conveniently fits into a camera bag for easy transportation to the location.
