

LitePad Vector is the go-to light fixture for on-location lighting!

Producing the same soft, even illumination LitePad is known for, LitePad Vector is the ideal lighting solution for cinematographers, gaffers, videographers, lighting directors and photographers. The new 8"x8" LitePad Vector produces four times the output of its 12"x12" LitePad predecessors.

The unit's light-weight, compact form-factor, coupled with its on-board dimming and color temperature controls and its compatibility with standard Anton/Bauer or V-Mount battery packs, allow the LitePad Vector to easily go everywhere a flattering, soft, LED light is needed.
