

X-Effects® LED Production Rental Kit

The X-Effects® LED Production Rental Kit features an X-Effects LED HO projector to create dynamic lighting effects for film & TV, stage productions, and live events. The fixture is designed to produce vivid water, fire, and other lighting effects by projecting light through a pair of off-set, overlapping gobos.

Capable of throws up to 65ft (20m), the 90W Rosco X-Effects LED HO projector is engineered to produce an amazing amount of output from a compact package. The X-Effects LED Production Rental Kit ships with either one 5500K cool white or one color-mixing RGBW model, and all four available lens options.

The X-Effects LED Projector can achieve a variety of lighting effects by inserting different gobos or by adding dichroic glass color filters into the fixture. To see different effects recipes [visit our YouTube page](#).
