

RoscoGrip™ Strips

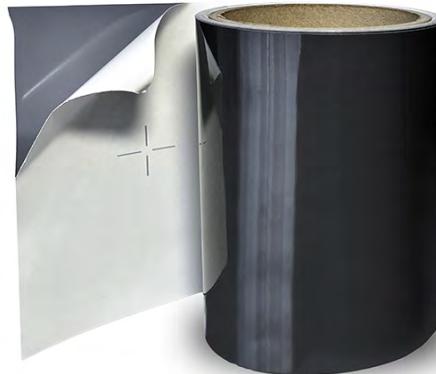

Whether it's headlights, emergency vehicle lights, or LED signage – RoscoGrip Strips are the easiest way to reduce the light output of non-dimmable light sources.

Featuring a medium-tack, repositionable adhesive, RoscoGrip Strips are N.6 neutral density filters that can quickly adhere to virtually any flat lighting surface - and then remove easily, once the project is done.

KEY FEATURES

- Easy application – just stick it to any clean and flat surface, then trim it to size!
- Repositionable, medium tack adhesive.

SPECIFICATIONS

Roll Dimensions:	6" x 25' (15.42cm x 7.62M) on a 3" (7.62cm) core
Weight:	13 oz. (365 g)
Material Thickness:	3 mil (82 µm) - without release liner
Transmission:	24.4% - 2 stop loss
Adhesive:	Medium-tack – repositionable
Application Temp.:	23°–77°F (5°–25°C)
Operational Temp.:	-22°–212°F (-30°–100°C)

Disclaimer: While the RoscoGrip adhesive should be safe to use on most surfaces and finishes, it is up to the end user to test the product beforehand to make sure the adhesive does not negatively affect the surface it's being adhered to.
